PROFILE

Software engineer in Madrid. I build backend and data systems and take them all the way to production. Digital Governance Trainee at Airbus Defence and Space, studying for two master's degrees.

EXPERIENCE

Digital Governance Trainee — Since Oct 2026
Airbus Defence and Space · Getafe, Madrid
Airbus Discover graduate programme, master's included. Data governance and support for AI solutions in Air Power Services.

Co-founder and Software Lead — Apr to Jun 2026
Byolux · Sevilla
Bioprocess optimisation startup in the Fusión Startups accelerator. We won its Supersprint with an MVP built in 72 hours.

Software Engineering Intern — Jan to Mar 2026
Seville City Council (ITAS) · Seville
Widgets and alert management with IoT device data for the Sevilla Smart City platform.

Server, J1 Work & Travel programme — Jun to Sep 2025
Grand Hyatt Deer Valley · Park City, Utah
Table service at a five-star resort, working in English in a multicultural team.

PROJECTS

Orderflow Terminal — TypeScript, Next.js, Fastify
A market terminal with options flow, gamma exposure and SEC fundamentals, on real, free data. View project

DocuChat — Python, FastAPI, pgvector
A RAG assistant that answers from your PDFs and cites the source of every answer. View project

VecinUs — FastAPI, React Native, GitHub Actions
An app for residential communities. I was the project manager and set up continuous integration and repository security. View project

Sports Value Detector — Python, scikit-learn, FastAPI
Football and tennis models measured against the closing odds, with an honest conclusion. View project

RecuerdaMed — React Native, Expo, Firebase
A medication app for patients and caregivers, with a public demo. View project

Analista incansable — Python, SQLite, n8n
A fundamentals screener that scores companies every day and sends alerts via Telegram. View project

Salon booking and scheduling — React, Express, MongoDB
Three-step booking for clients and a panel for the business. I built the whole frontend and the management API. View project

Poké-Hub — Flask, Docker, GitHub Actions
A platform to publish model datasets. I built the public profile with each user's datasets and almost half of the tests. View project

EDUCATION

Master's in Software Engineering: Cloud, Data and IT Management
University of Seville
2026 to 2028

Lifelong Learning Master's in Organizational Management in Digital Environments and Data Analytics
Camilo José Cela University, part of the Airbus Discover graduate programme
2026 to 2027

BSc in Computer Engineering, Software Engineering
University of Seville, ETSII. Bachelor's thesis: RecuerdaMed
2022 to 2026
